### CONFERRING OF DEGREES IN COURSE

THE degrees about to be conferred are earned degrees. They are awarded by authority of the State of Texas invested in the Trustees of the Rice Institute, and by the Trustees delegated to their representative on this occasion. The degrees are conferred on recommendation of the Faculty, and in the procedure the Secretary of the Faculty will introduce the candidates, the Bursar and the Curator will serve as marshals, the hoods will be invested by the Dean, and the diplomas received from the Registrar.

Under the accelerated programme induced by the national emergency, many members of this class, on completion of the requirements for their respective degrees, have already been inducted into war service and are unable to return for this ceremony. These members of the class are granted their degrees at this time *in absentia*.
